

ORACLE RED BULL RACING

AI 기반 브랜드 광고 스토리보드 & 제작 파이프라인

기획 의도 → 프롬프트 설계 → AI 생성 → 멀티모달 통합 편집

FINAL CAMPAIGN FILM

F1_FINAL_V15.mp4

48.96 sec | 3840×2160 | 24 fps | H.264 / AAC

1. 브랜드 아이덴티티 & 캠페인 기획

최종 영상에서 유지한 브랜드 톤, 메시지 구조, 제작 전략

브랜드 아이덴티티

브랜드명 Oracle Red Bull Racing

타겟 F1·모터스포츠 팬, 속도·정밀함·첨단 엔지니어링 이미지를 선호하는 10~30 대 디지털 시청자

톤앤매너 Dark / cinematic / technical / premium / aggressive. 다크 네이비·레드·옐로 포인트, 낮은 카메라, 강한 대비, 금속·카본 질감.

USP 단순한 최고속도보다 “수천 번의 계산과 정밀함이 단 한 순간의 속도를 만든다”는 엔지니어링 이미지를 브랜드 가치로 전환.

광고 목적 브랜드 인지도 및 감정적 몰입 강화. 차량의 성능 자체보다 정밀함·결단·극한의 이미지를 기억시키는 브랜딩.

핵심 메시지 Precision creates speed. At the limit, there is no room for almost.

서사 구조

- 준비: “BEFORE THE LIGHTS GO OUT” - 보이지 않는 준비와 정밀함을 강조
- 축적: 피트/차고의 반복 작업과 계산 → “PRECISION BEFORE SPEED”
- 증명: 실제 레이스 속도와 근접 질주 → “NO ROOM FOR ALMOST”
- 전환: “THEN THE LIGHTS GO OUT” - 음악을 걷어내고 엔진에 집중
- 클라이맥스: 정지 상태의 진동 → 출발 순간 고주파 V10 질주음 → 로고/브랜드 음성으로 종료

멀티모달 제작 파이프라인

1. 이미지	2. 영상	3. 음악/보이스	4. 효과음	5. 통합 편집
ChatGPT Image Generation	Kling AI Image-to-Video	Suno / ElevenLabs	ElevenLabs SFX + 엔진 소스	FFmpeg 기반 컷·자막·오디오 싱크

도구 선택 이유 및 대체 도구

도구	선택 이유	대체 도구
ChatGPT Image Generation	스토리보드 단계에서 구도·차량·조명 레퍼런스를 빠르게 고정	Midjourney / Gemini Image
Kling AI	정지 이미지의 차량 형태를 유지하면서 짧은 시네마틱 모션 생성	Runway / Pika
Suno	음악의 템포·에너지·구간 구조를 자연어로 빠르게 탐색	Udio
ElevenLabs TTS	중저음 남성 보이스를 반복 조정하고 문장별 파일로 싱크 가능	Azure/Google TTS
ElevenLabs Sound Effects	엔진·기계음·전환음 프롬프트 실험	Adobe Firefly SFX / MMAudio

SCENE 1

BEFORE THE LIGHTS GO OUT / PREPARATION

0.00 - 14.75 sec

씬 길이	약 14.75 초
목표 메시지	속도는 출발 순간이 아니라 그 이전의 반복·측정·준비에서 시작된다.
화면 구성	검은 타이틀 카드 “BEFORE THE LIGHTS GO OUT” → 어두운 피트/차고의 F1 머신. 정면·로우앵글·네온 조명, 정비 환경과 차량의 정적 긴장감을 강조.
내레이션/카피	Before the lights go out. / Every detail is measured. / Every movement has a purpose. / Hundreds of hours come down to seconds.
사용 도구	ChatGPT Image Generation: 키 비주얼/차량 스타일 고정. Kling AI: 조명·카메라·차체 진동 모션. ElevenLabs: 내레이션. Suno: 배경음악.
출력 결과	정지된 머신과 피트 환경만으로 “속도 이전의 준비”를 설명하는 도입부 확보.
결과 파일	RBR_SC01_keyvisual.png / RBR_SC01_motion.mp4 / Every detail is measured..mp3 / Every movement has a purpose..mp3

IMAGE / VIDEO INPUT PROMPT (원문)

어두운 피트 내부, 정지 상태의 F1 머신. 매우 낮은 카메라 앵글에서 전면 윙과 타이어를 클로즈업으로 시작 → 카메라가 천천히 후진하며 차량 전체를 드러냄 → 조명이 순차적으로 켜지며 차가 깨어남 → 엔진이 살아나며 차체가 미세하게 진동. 카메라는 부드럽고 시네마틱 무빙. 차 디자인, 색상, 환경 유지.

VOICE DESIGN PROMPT (최종 방향)

Deep male cinematic voice with a strong, controlled baritone. Low to medium-low pitch, rich and solid but not extremely deep. Confident, calm and authoritative with subtle metallic texture. Natural human voice first, restrained emotion, clear pronunciation, deliberate pauses. Avoid extreme bass, monster-like growling and booming trailer-announcer delivery.

SCENE 2

PRECISION BEFORE SPEED / RACE PACK

14.75 - 24.30 sec

씬 길이	약 9.55 초
목표 메시지	정밀함이 실제 레이스 상황에서 속도와 판단으로 전환되는 순간을 보여준다.
화면 구성	타이틀 카드 “PRECISION BEFORE SPEED” → 여러 대의 머신이 동시에 가속하는 트랙 장면. 프레임 안에 다수 차량을 배치해 경쟁 압력과 속도감을 확장.
내레이션/카피	Precision before speed. / Nothing here is accidental. / Thousands of decisions before one moment.
사용 도구	Kling AI: 레이스 모션/카메라 추적. ElevenLabs TTS: 카피. AI/생성 엔진 레이어: 다중 차량 질주감. Suno: BGM 유지.
출력 결과	정적인 기술 이미지에서 실제 레이스 에너지로 자연스럽게 전환. 다수 차량의 레이어로 긴장도 상승.
결과 파일	RBR_SC02_motion.mp4 / Precision before speed..mp3 / 차 여러대.mp3

VIDEO INPUT PROMPT (원문)

Multiple Formula racing cars accelerate together at very high speed on a professional circuit. Strong forward momentum, low trackside camera, rapid realistic acceleration, sharp vehicle structure, background motion blur, precise racing lines and premium cinematic commercial lighting. Preserve realistic car proportions and avoid morphing or deformation.

AUDIO INPUT PROMPT (다중 차량)

A pack of modern open-wheel formula race cars accelerating together at full racing speed on a professional circuit. Multiple powerful high-revving racing engines, aggressive exhaust pulses, rapid sequential upshifts, sharp transmission cuts. The racing engines must dominate the audio. No crowd, no dialogue, no crashes.

SCENE 3

NO ROOM FOR ALMOST / CLOSE PASS

24.30 - 34.05 sec

씬 길이	약 9.75 초
목표 메시지	극한 영역에서는 작은 차이가 결과를 결정한다는 메시지를 시각·음향으로 압축한다.
화면 구성	검은 타이틀 카드 “NO ROOM FOR ALMOST” → 차량 근접 패닝/사이드 질주. 차체는 선명하게 유지하고 배경은 빠르게 흘러가도록 구성.
내레이션/카피	No room for almost. / The difference is measured in fractions.
사용 도구	Kling AI: 근접 추적과 모션 블러. ElevenLabs: 내레이션. 엔진/SFX: 도플러 통과음 및 변속 레이어.
출력 결과	브랜드의 “정밀함”을 추상 문구에서 실제 속도의 체감으로 연결. 근접 통과로 몰입도 상승.
결과 파일	RBR_SC03_motion.mp4 / ElevenLabs_2026-08-28T11_03_59_1_gen_sp92_s50_sb75_m2.mp3 / The difference is measured in fractions..mp3

IMAGE / VIDEO INPUT PROMPT (원문)

Using the exact same Formula 1 car from the reference image, create a dramatic photorealistic shot of the car attacking a high-speed corner. Extremely low trackside camera positioned near the apex, the car passing very close to the camera. Strong motion blur affects the background while the vehicle remains sharp. Preserve the exact vehicle design, proportions and livery. No vehicle deformation or morphing.

SOUND INPUT PROMPT (원문)

Formula 1 race car screaming through a high-speed corner and passing extremely close to the microphone, aggressive high RPM engine, rapid Doppler pass-by, subtle metallic sparks, realistic racing sound. Engine sound is the primary and loudest sound. No music, crowd, dialogue, explosions or tire squeal.

SCENE 4

THEN THE LIGHTS GO OUT / LAUNCH SETUP

34.05 - 38.85 sec

THEN THE LIGHTS GO OUT

씬 길이	약 4.80 초
목표 메시지	설명과 음악을 건너내고 “출발 직전의 정적”을 만들어 클라이맥스의 대비를 극대화한다.
화면 구성	검은 타이틀 카드 “THEN THE LIGHTS GO OUT” → 스타트 직전 정지 차량. 차량은 미세하게 진동하고 조명과 브레이크등이 긴 장감을 유지.
내레이션/카피	Then the lights go out.
사용 도구	ElevenLabs TTS: 문구. 전환 SFX: 1 초 짧게 삽입 후 페이드아웃. 오디오 편집: 배경음악 제거, 정지 상태 엔진 저역 진동만 유지.
출력 결과	출발 전 1~2 초의 음향 공간을 확보하여 다음 장면의 고주파 엔진이 훨씬 크게 느껴지도록 설계.
결과 파일	ElevenLabs_2026-08-28T10_52_08_1_gen_sp70_s50_sb75_m2.mp3 / asproductionmusic-cinematic-sound-fx-582073.mp3

VIDEO INPUT PROMPT (원문)

The Formula 1 car remains stationary on the starting grid. The engine causes subtle realistic vibration in the bodywork. Heat distortion gently appears behind the exhaust area. The camera slowly pushes forward toward the rear of the car. Dark cinematic atmosphere, realistic physics, premium racing commercial cinematography. Keep the exact car design, colors and proportions unchanged.

VOICE / SOUND DIRECTION

Voice: calm, low-to-medium baritone, deliberate pause. Music is removed through the launch setup. Keep only the short cinematic transition FX and a restrained low engine vibration so that the actual launch can arrive with a clear acoustic contrast.

SCENE 5

FULL THROTTLE / BRAND REVEAL

38.85 - 48.96 sec

씬 길이	약 10.11 초
목표 메시지	출발 순간의 폭발적인 속도를 브랜드 시그니처로 전환하고 Oracle Red Bull Racing 을 최종 기억점으로 남긴다.
화면 구성	정지 차량이 출발 → 저역 진동에서 고주파 V10 질주음으로 전환 → 스파크/고속 질주 → 엔진음 자연 페이드아웃 → 항공/오버헤드 로고 리빌.
내레이션/카피	주행 중 내레이션 없음. 마지막: “Oracle Red Bull Racing.”
사용 도구	Kling AI: 야간 질주/스파크 모션. 엔진 사운드: 레퍼런스 소스의 4 초 지점부터 출발 프레임에 재싱크. ElevenLabs: 브랜드 보이스. FFmpeg: 엔진 페이드아웃·로고 싱크.
출력 결과	출발 전 덜덜거리는 저주파 → 차가 움직이는 순간 고주파 10 기통 계열 사운드 → 로고 구간에서 자연스럽게 감쇠하는 최종 클라이맥스 완성.
결과 파일	ScreenRecording_08-28-2026 20-06-27_1.MP4 / oracle redbull racing(1).mp3 / F1_FINAL_V15.mp4

IMAGE / VIDEO INPUT PROMPT (원문)

Using the exact same Formula 1 car from the reference image, create a photorealistic cinematic shot of the car launching aggressively from the starting grid at night. Rear three-quarter tracking perspective from an extremely low camera near the asphalt. Track lights stretch into strong horizontal motion blur. Subtle heat distortion and small sparks underneath the floor. Maintain exactly the same livery, aerodynamic design and proportions. Realistic racing physics. No morphing or deformation.

FINAL ENGINE SYNC DIRECTION

Keep the low vibrating engine sound while the car is stationary. At the exact frame the car begins moving, start the provided engine source from its 4.0-second point so the high-frequency V10-like scream begins with the launch. Near the Oracle Red Bull Racing reveal, do not hard-cut the engine; apply a smooth fade-out under the brand voice.

2. 프롬프트 수정 로그 & 제작 의사결정

한 번의 생성으로 끝내지 않고 결과를 보고 프롬프트/도구/편집 방식을 수정한 기록

A. 영상 프롬프트 - 차량 일관성

수정 전

F1 car racing at night, cinematic, fast motion, sparks.

문제

차량 차체·리버리·비율이 컷마다 변형되거나 움직임 중 형태가 흔들림. 같은 브랜드 차량이라는 인지가 약해짐.

수정 후

Using the exact same Formula 1 car from the reference image. Keep the exact vehicle design, colors, aerodynamic proportions and livery unchanged. Realistic Formula 1 physics. No morphing or deformation. The vehicle remains sharp while only the background receives strong motion blur.

수정 이유 / 결과

레퍼런스 차량과 “exact same / unchanged / no morphing”을 반복 명시해 장면 사이 차량 일관성이 개선되었고, 속도감은 배경 모션 블러로 분리해 표현할 수 있었다.

B. 배경음악 - 긴장감 중심 → 더 높은 에너지

초기 방향

Dark cinematic score, mechanical tension, deep sub bass, sparse drums, rising strings, brief silence, intense high-speed climax, sleek and dramatic, instrumental.

문제

고급스럽고 긴장감은 있었지만 레이스 광고에 필요한 “신나는 속도감”이 부족함.

최종 Suno 방향

High-energy cinematic racing trailer, instrumental only. Fast, adrenaline-filled, aggressive and exhilarating. Rapid electronic percussion, deep rhythmic bass, urgent string ostinatos, powerful cinematic drums, aggressive distorted bass synths and relentless forward momentum. Create sharp stop-and-go moments so engine sounds can cut through. Around 140 BPM.

결과

BGM 파일 Carbon Apex(1).mp3 를 선택. 최종 질주에서는 음악을 제거해 엔진음 자체를 클라이맥스로 사용했다.

C. 보이스 디자인 - 너무 굵음 → 중저음의 통제된 바리톤

과도한 버전

Extremely deep male cinematic voice, massive low-end resonance, very low pitch, heavy chest resonance, dark metallic texture.

문제

목소리가 지나치게 거대하고 캐릭터성 강하게 들려 광고의 프리미엄·정밀한 분위기를 뒀음.

최종 버전

Deep male cinematic voice with a strong, controlled baritone. Low to medium-low pitch, rich and solid but not extremely deep. Confident, calm and authoritative. Natural human voice first, with only a faint mechanical quality. Measured pacing and clear pronunciation.

D. 엔진음 - 자동 생성 실패 후 프레임 기반 싱크

- FineVoice Video-to-Audio: 차량 움직임을 엔진보다 바람/공기 소리로 해석하여 결과가 부적합.
- MMAudio ZeroGPU: 무료 GPU 할당량 제한으로 반복 생성이 어려움.
- 최종 전략: 질주 전 저역 진동과 출발 후 고주파 엔진 소스를 분리하고, 실제 출발 프레임에 맞춰 재배치. 로고 구간에는 엔진 페이드아웃 적용.
- 이 과정에서 “도구를 많이 쓰는 것”보다 결과 실패 원인을 파악하고 다른 생성/편집 전략으로 전환하는 것이 중요하다는 점을 확인.

3. 최종 산출물 & 제출 체크

최종 V15 완성본을 기준으로 정리

최종 영상 파일 정보

파일명	F1_FINAL_V15.mp4
길이	48.96 초
해상도	3840 × 2160 (4K)
프레임레이트	24 fps
비디오 코덱	H.264
오디오 코덱	AAC
브랜드 리빌	마지막 구간 Oracle Red Bull Racing 로고 + 음성
주요 AI 소스	ChatGPT Image Generation / Kling AI / Suno / ElevenLabs

제작 파일명 규칙

- 이미지: RBR_SC##_keyvisual.png
- 영상: RBR_SC##_motion.mp4
- 보이스: 문장별 ElevenLabs mp3 → 최종 타임라인에 개별 배치
- 배경음악: Carbon Apex(1).mp3
- 최종 통합본: F1_FINAL_V15.mp4

요구 항목 대응

항목	반영 내용
브랜드/타겟/톤앤매너/USP 정의	완료
씬별 길이·목표·구도·카피·도구·프롬프트·결과·파일명	완료
프롬프트 수정 전/후 및 수정 이유	완료
이미지 생성 AI 사용	ChatGPT Image Generation
비디오 생성/변환 AI 사용	Kling AI
오디오 생성 AI 사용	Suno, ElevenLabs
도구 대안 준비	Runway/Pika, Udio, Firefly/MMAudio 등
브랜드 인지 장치	Oracle Red Bull Racing 로고 + 브랜드 보이스
통합 편집	컷·자막·오디오 싱크·페이드 및 레벨 조정

한 문장 제작 회고

초기 이미지 단계에서 차량의 시각적 일관성을 고정하고, 영상 생성에서는 “형태 보존 + 카메라/배경만 움직이기”를 명시했으며, 오디오에서는 음악·내레이션·엔진을 각각 따로 생성한 뒤 프레임 단위로 결합했다. 생성형 AI 결과가 의도와 다를 때는 같은 도구를 무작정 재생성하기보다 프롬프트를 좁히거나 다른 도구·편집 전략으로 전환해 최종 브랜드 경험을 완성했다.

4. 전체 프롬프트 아카이브

실제 제작 과정에서 입력·수정·실험한 생성 프롬프트를 작은 글씨로 한데 정리. 최종본에 직접 반영되지 않은 실패/대체 도구 실험도 제작 의사결정 기록을 위해 포함했다.

A. 이미지 / 비디오 생성

Scene 1 / Image - starting grid still

Create a photorealistic cinematic advertising shot of an Oracle Red Bull Racing Formula 1 car waiting on the starting grid of a night circuit. Rear three-quarter view, extremely low camera positioned close to the asphalt. The car has the recognizable dark navy, red and yellow Red Bull Racing visual identity, realistic carbon fiber bodywork and aggressive Formula 1 aerodynamics. Red starting lights glow out of focus in the distance. Dark atmosphere, subtle haze, dramatic rim lighting, shallow depth of field, premium Formula 1 commercial cinematography, realistic proportions and materials. 16:9 composition. No text or typography in the image.

Note. ChatGPT Image Generation 용 초기 키 비주얼 프롬프트.

Scene 1 / Video - stationary pre-launch

The Formula 1 car remains stationary on the starting grid. The engine causes subtle realistic vibration in the bodywork. Heat distortion gently appears behind the exhaust area. The camera slowly pushes forward toward the rear of the car. The red starting lights remain glowing in the distance. Dark cinematic atmosphere, realistic physics, premium Formula 1 commercial cinematography. Keep the exact car design, colors and proportions of the reference image unchanged.

Note. Kling Image-to-Video 용.

Scene 2 / Image - aggressive launch

Using the exact same Formula 1 car from the reference image, create a photorealistic cinematic shot of the car launching aggressively from the starting grid at night. Rear three-quarter tracking perspective from an extremely low camera near the asphalt. The car is sharply detailed while the circuit lights and background stretch into strong horizontal motion blur. Subtle heat distortion and small sparks underneath the floor. Emphasize explosive acceleration and raw power. Maintain exactly the same dark navy, red and yellow livery, aerodynamic design and proportions as the reference car. Premium Formula 1 advertising cinematography, dramatic lighting, high contrast, realistic physics. 16:9. No text.

Note. 차량 일관성 유지를 위해 Scene 1 레퍼런스 이미지 사용.

Scene 2 / Video - launch motion

The Formula 1 car launches explosively forward from the starting grid. Rapid realistic acceleration. The rear tires rotate rapidly as the car accelerates away. Track lights stretch into motion blur while the car itself remains sharp and structurally consistent. The camera tracks the car from a very low rear three-quarter position. Subtle sparks appear underneath the floor and trail briefly behind the car. Keep the exact vehicle design and livery unchanged. Realistic Formula 1 physics. No morphing or deformation.

Note. Kling Image-to-Video 용.

Scene 3 / Image - high-speed corner

Using the exact same Formula 1 car from the reference image, create a dramatic photorealistic shot of the car attacking a high-speed corner on a night racing circuit. Extremely low trackside camera positioned near the apex, the car passing very close to the camera. The Formula 1 car remains sharp and clearly recognizable. A dramatic but realistic shower of sparks trails from underneath the floor as the car compresses through the corner. Background circuit lights stretch into motion blur to communicate extreme speed. Maintain exactly the same dark navy, red and yellow livery, aerodynamic design and proportions as the reference car. Premium Formula 1 advertising cinematography, high contrast, dramatic night lighting, photorealistic. 16:9. No text.

Note. 근접 코너/스파크 키 비주얼.

Scene 3 / Video - close pass + sparks

The Formula 1 car rapidly attacks the corner and passes extremely close to the camera. The camera smoothly pans to follow the car. A realistic shower of bright sparks trails backward from underneath the floor as the car compresses through the corner. Strong motion blur affects the background while the vehicle remains sharp. Extreme sense of speed, realistic Formula 1 physics. Preserve the exact vehicle design, proportions and livery. No vehicle deformation or morphing.

Note. Kling Image-to-Video 용.

Scene 4 / Image - hero reveal

Using the exact same Formula 1 car from the reference image, create a premium cinematic hero shot. The Formula 1 car is stationary in an almost completely black environment. Front three-quarter perspective from a low camera angle. A narrow dramatic rim light traces the aerodynamic silhouette, front wing, tires and carbon fiber surfaces while most of the car remains hidden in darkness. Maintain exactly the same dark navy, red and yellow livery and vehicle design from the reference. Powerful, mysterious, sophisticated Formula 1 campaign aesthetic. Photorealistic automotive advertising photography. Large clean dark negative space above and around the vehicle for typography. 16:9. No text.

Note. 브랜드 히어로/로고 리veal용 이미지.

Scene 4 / Video - hero light reveal

The Formula 1 car remains completely stationary. Begin almost entirely in darkness. A narrow cinematic light slowly travels across the car from front to rear, gradually revealing the aerodynamic bodywork and carbon fiber surfaces. Very slow controlled camera push-in. The car design, proportions and livery remain perfectly unchanged. Premium Formula 1 commercial. End on a dramatic hero shot surrounded by darkness.

Note. Kling Image-to-Video 용.

Refined / Garage motion

어두운 피트 내부, 정지 상태의 F1 머신. 매우 낮은 카메라 앵글에서 전면 휠과 타이어를 클로즈업으로 시작 → 카메라가 천천히 후진하며 차량 전체를 드러냄 → 조명이 순차적으로 켜지며 차가 깨어남 → 엔진이 살아나며 차체가 미세하게 진동. 카메라는 부드럽고 시네마틱 무빙. 차 디자인, 색상, 환경 유지.

Note. 최종 도입부의 피트/차고 방향.

Refined / Race pack video

Multiple Formula racing cars accelerate together at very high speed on a professional circuit. Strong forward momentum, low trackside camera, rapid realistic acceleration, sharp vehicle structure, background motion blur, precise racing lines and premium cinematic commercial lighting. Preserve realistic car proportions and avoid morphing or deformation.

Note. 다중 차량 질주 구간.

Refined / Close-pass video

Using the exact same Formula 1 car from the reference image, create a dramatic photorealistic shot of the car attacking a high-speed corner. Extremely low trackside camera positioned near the apex, the car passing very close to the camera. Strong motion blur affects the background while the vehicle remains sharp. Preserve the exact vehicle design, proportions and livery. No vehicle deformation or morphing.

Note. NO ROOM FOR ALMOST 구간.

Refined / Launch setup video

The Formula 1 car remains stationary on the starting grid. The engine causes subtle realistic vibration in the bodywork. Heat distortion gently appears behind the exhaust area. The camera slowly pushes forward toward the rear of the car. Dark cinematic atmosphere, realistic physics, premium racing commercial cinematography. Keep the exact car design, colors and proportions unchanged.

Note. THEN THE LIGHTS GO OUT 이후 정지 구간.

Refined / Final launch video

Using the exact same Formula 1 car from the reference image, create a photorealistic cinematic shot of the car launching aggressively from the starting grid at night. Rear three-quarter tracking perspective from an extremely low camera near the asphalt. Track lights stretch into strong horizontal motion blur. Subtle heat distortion and small sparks underneath the floor. Maintain exactly the same livery, aerodynamic design and proportions. Realistic racing physics. No morphing or deformation.

Note. 최종 질주 구간.

B. 엔진 / 효과음 생성

SFX / Scene 1 idle

Formula 1 race car idling on a starting grid, deep aggressive racing engine, subtle mechanical vibration, tense cinematic atmosphere, close microphone perspective, no crowd, 2 seconds

Note. 초기 ElevenLabs SFX.

SFX / Scene 2 launch

Formula 1 race car launching aggressively from a standing start, engine RPM rapidly rising, powerful acceleration, rapid gear shift, realistic modern Formula 1 engine, cinematic motorsport commercial, 3 seconds

Note. 초기 ElevenLabs SFX.

SFX / Scene 3 close pass

Formula 1 race car screaming through a high-speed corner and passing extremely close to the microphone, aggressive high RPM engine, rapid Doppler pass-by, short aerodynamic whoosh, subtle metallic sparks, realistic motorsport sound, 2 seconds

Note. 초기 ElevenLabs SFX.

SFX / Scene 4 ending impact

Deep cinematic bass impact followed by a subtle dark mechanical resonance, premium luxury motorsport advertisement ending, powerful but minimal, 2.5 seconds

Note. 초기 엔딩 효과음 실험.

SFX / Race pack refined

A pack of modern open-wheel formula race cars accelerating together at full racing speed on a professional circuit. Multiple powerful high-revving racing engines, aggressive exhaust pulses, rapid sequential upshifts, sharp transmission cuts. The racing engines must dominate the audio. No crowd, no dialogue, no crashes.

Note. 다중 차량 장면용.

SFX / Close pass refined

Formula 1 race car screaming through a high-speed corner and passing extremely close to the microphone, aggressive high RPM engine, rapid Doppler pass-by, subtle metallic sparks, realistic racing sound. Engine sound is the primary and loudest sound. No music, crowd, dialogue, explosions or tire squeal.

Note. 근접 통과 엔진 강조.

Firefly / Base acceleration

Modern high-performance open-wheel formula race car accelerating hard from medium speed to full throttle. Powerful high-revving turbo-hybrid racing engine with aggressive exhaust pulses, sharp mechanical harmonics, deep low-frequency power and subtle turbo whistle. The engine RPM should rise continuously and rapidly as the car accelerates. Extremely fast, precise and visceral, recorded from trackside with professional microphones. Realistic racing engine, not a road car. No music. No crowd. No narration. No tire squeal. No cinematic boom. No V8 muscle car sound. No motorcycle sound. Only engine, transmission and exhaust.

Note. Adobe Firefly SFX 실험용.

Firefly / Doppler pass-by

A modern open-wheel formula race car approaching the camera at extreme speed, passing extremely close to the trackside microphone, then rapidly disappearing into the distance. Powerful high-revving turbo-hybrid racing engine and aggressive exhaust. Very strong realistic Doppler effect. The

engine begins distant and rapidly becomes louder and higher in pitch as the car approaches. At the exact moment the car passes the microphone, the engine becomes extremely loud, sharp and visceral with a powerful rush of air. Immediately after passing, the pitch drops and the sound rapidly fades into the distance. Single race car only. Professional trackside motorsport recording. No music. No crowd. No narration. No tire squeal. No explosions. No artificial cinematic effects. Realistic Doppler pass-by.

Note. Adobe Firefly SFX 실험용.

Firefly / Rapid upshifts

Close trackside recording of a modern formula race car accelerating at full throttle through several extremely rapid sequential upshifts. High-revving turbo-hybrid racing engine. During each gear change, the engine sound cuts for a fraction of a second, followed immediately by an aggressive surge in RPM. Three rapid upshifts. Very short, sharp and precise transmission cuts. Aggressive exhaust pulse after each shift. Mechanical, violent and extremely fast. No music. No crowd. No narration. No explosions. No exaggerated backfire. Realistic professional racing transmission and exhaust.

Note. 변속음 실험용.

Firefly / Downshifts

Modern formula race car braking hard into a high-speed corner. Rapid sequential downshifts with sharp engine blips, aggressive exhaust pulses and subtle turbo flutter. The engine RPM falls rapidly under braking, then briefly rises with each downshift. Three to four fast downshifts. Mechanical, precise and aggressive. Subtle restrained exhaust crackles, not explosions. Professional trackside recording. No music. No crowd. No narration. No tire squeal. No huge backfires.

Note. 다운시프트 실험용.

Firefly / Engine away

A high-performance formula race car accelerating away from the camera down a long straight. The engine begins loud and powerful, then rapidly becomes more distant as the car disappears down the track. High-revving racing engine with realistic exhaust and natural distance attenuation. Smooth realistic Doppler shift and trackside ambience. Single car only. No music. No crowd. No narration.

Note. 엔진 소리/거리감 실험용.

C. 배경음악 생성

Suno / Trial 1 - rejected tag

Dark cinematic motorsport score, tense mechanical pulse, deep sub bass, sparse percussion, rising strings, brief silence before racing, explosive high-speed section, no vocals, 120 BPM

Note. Suno 가 “motorsport”를 producer tag 로 오인해 생성 거절.

Suno / Safe retry

Dark cinematic trailer score, tense mechanical pulse, deep sub bass, sparse percussion, rising strings, brief silence before action, explosive high-speed section, no vocals, 120 BPM

Note. 태그 오류 회피용 수정본.

Suno / High-energy final direction

High-energy cinematic racing trailer, instrumental only. Fast, adrenaline-filled, aggressive and exhilarating. Start with a tense but energetic pulse: rapid electronic percussion, ticking hi-hats, deep rhythmic bass, short mechanical impacts, rising synth pulses, and urgent string ostinatos. Build momentum constantly with powerful toms, punchy cinematic drums, aggressive distorted bass synths, fast rhythmic strings, risers, impacts, and accelerating percussion. Create a short dramatic drop just before the main action: almost complete silence for a moment, then hit hard with an explosive high-speed section. After the drop, become extremely energetic and exciting with huge punchy drums, rapid string ostinatos, aggressive bass pulses, sharp synth rhythms, fast percussion, powerful impacts, and relentless forward momentum. Make the climax feel like maximum speed, danger, precision and adrenaline. Include several sharp stop-and-go moments so loud engine and exhaust sounds can cut through the music. Final section should rise even higher with faster percussion, stronger bass and huge cinematic tension, then end with one massive clean impact for the final logo. Fast, intense, exhilarating, aggressive, sleek, dangerous, powerful, high-speed, cinematic. No vocals, no choir, no happy pop melody, no EDM festival drop, no funky groove, no slow ambient section. Tempo around 140 BPM.

Note. 최종 BGM 생성 방향. 결과: Carbon Apex 계열.

D. 내레이션 보이스 디자인

ElevenLabs / Documentary voice trial

A male cinematic documentary narrator in his early 30s with a subtle British-international English accent. Low to medium-low register, calm, intelligent and controlled. The voice should sound premium, precise and slightly cold, like a high-end motorsport engineering documentary. Measured pacing with short deliberate pauses. Restrained intensity rather than dramatic movie-trailer exaggeration. Confident but never aggressive. Slight natural breath and texture. Close-microphone studio recording. Avoid booming trailer-announcer voice, radio-commercial delivery, excessive bass, cheerfulness, overacting.

Note. 초기 보이스 방향.

ElevenLabs / Too-deep trial

Extremely deep male cinematic voice, massive low-end resonance, powerful baritone with a dark metallic texture. Very low pitch, slow and deliberate delivery, commanding presence, heavy chest resonance, strong sub-bass character. The voice should feel enormous, mechanical, ancient, intelligent and authoritative, like a giant advanced machine speaking with calm control. Slightly gravelly and textured, but still clear and intelligible. Each sentence should feel weighty and deliberate, with strong pauses between phrases. Minimal emotional variation. Calm, serious, intimidating and controlled rather than angry. Close-microphone studio quality, rich low frequencies, subtle mechanical resonance, cinematic scale. Avoid high pitch, thin voice, friendly commercial tone, cheerfulness, fast speech, cartoonish robot effects, excessive distortion, monster growling.

Note. 너무 깊게 들려 이후 수정.

ElevenLabs / Final voice design

Deep male cinematic voice with a strong, controlled baritone. Low to medium-low pitch, rich and solid but not extremely deep. Confident, calm and authoritative with subtle metallic texture and slight gravel. The voice should feel powerful, intelligent and precise, with a modern cinematic presence. Natural human voice first, with only a faint mechanical quality. Measured pacing, clear pronunciation, restrained emotion, and deliberate pauses. Avoid extreme bass, monster-like growling, booming trailer-announcer voice, cartoon robot effects, heavy distortion, overly slow speech, excessive gravel.

Note. 최종 TTS 음색 방향.

E. 무료/대체 Video-to-Audio 실험

FineVoice / Whole-video attempt

Realistic Formula race car audio. Quiet mechanical garage ambience at first, then powerful high-revving racing engines, rapid gear shifts and exhaust. Intense close pass-by with strong Doppler effect during the final racing sequence.

Note. 결과가 바람 소리 위주라 채택하지 않음.

FineVoice / Negative description

music, dialogue, narration, crowd, cheering, explosions, tire squeal, motorcycle, road car, fake cinematic booms

Note. FineVoice 제외 조건.

MMAudio / Garage

Quiet professional Formula racing garage, subtle cooling fans, low mechanical hum, occasional pneumatic hiss and small metallic tool sounds, stationary race car, restrained realistic pit garage ambience

Note. 무료 대체 실험.

MMAudio / Race pack

A pack of modern open-wheel formula race cars accelerating together at full racing speed on a professional circuit, powerful high-revving racing engines, aggressive exhaust, rapid sequential gear shifts, sharp transmission cuts, realistic trackside recording

Note. 무료 대체 실험.

MMAudio / Close pass

A modern open-wheel Formula racing car passes extremely close to a trackside microphone at very high speed, powerful high-revving engine, aggressive exhaust, rapid upshifts, strong realistic Doppler pass-by, engine becomes extremely loud at the pass then quickly fades away

Note. 무료 대체 실험.

MMAudio / Final run

A modern open-wheel Formula racing car accelerating violently at full throttle, extremely powerful high-revving racing engine, aggressive exhaust pulses, rapid gear changes, mechanical transmission noise, intense realistic track recording, engine dominates the sound

Note. 무료 대체 실험.

F. 최종 편집·싱크 지시

MMAudio / Negative prompt

wind noise, strong wind, music, dialogue, narration, crowd, cheering, tire squeal, crashes, explosions, motorcycle, road car

Note. 바람음 억제용. ZeroGPU 할당량으로 반복 생성 중단.

Final engine sync direction

Keep the low vibrating engine sound while the car is stationary. At the exact frame the car begins moving, start the provided engine source from its 4.0-second point so the high-frequency V10-like scream begins with the launch. Near the Oracle Red Bull Racing reveal, do not hard-cut the engine; apply a smooth fade-out under the brand voice.

Note. 최종 V15 에서 사용한 프레임 기반 엔진 싱크 지시.

Final blackout / launch sound direction

Voice: calm, low-to-medium baritone, deliberate pause. Music is removed through the launch setup. Keep only the short cinematic transition FX and a restrained low engine vibration so that the actual launch can arrive with a clear acoustic contrast.

Note. THEN THE LIGHTS GO OUT 구간의 사운드 설계.
